Easy to determine:

1. Which records have issues - Error
2. What file they came from – "edtrans13145"
3. What position they were in the file – 4th and 8th records
4. Specific student – Unknown and Albert O Christian

Quick-n-Easy for Linux Benefits Recap

- Runs automatically on a schedule you set

- Automatically generates the PDF files

- Student name (First, Middle, Last) is part of the pdf file name

- Smaller PDF file size

- Faster error detection

- It's free!

Installation Requirements

- Your IT team will need to identify space on an existing Linux server.

- NSC will provide an installation guide

- NSC will provide the end user with operating instructions

Engagement Partners

Next Steps

- Working with the actively engaged schools to complete their setup, testing, and evaluation of Quick-n-Easy for Linux

- Recruiting additional volunteers to participate in the testing. Please contact ajohnson@studentclearinghouse.org.

- Completing support documentation

- Finalizing the distribution process

REVERSE TRANSFER

A landmark project to
**award tens of thousands of students
the degrees they earn**, but don't have

Student Mobility

Why a National Solution?

- Most students are mobile

  – 54% of enrollments (transfer ins and outs) at a typical institution are mobile at any given time, on average

- Transfer patterns are complex

  – **25% of all transfers move between states**

Reverse transfer can make the difference!

The **most** important reason is the student receives a credential which has an impact on his or her life!

How does Reverse Transfer work?
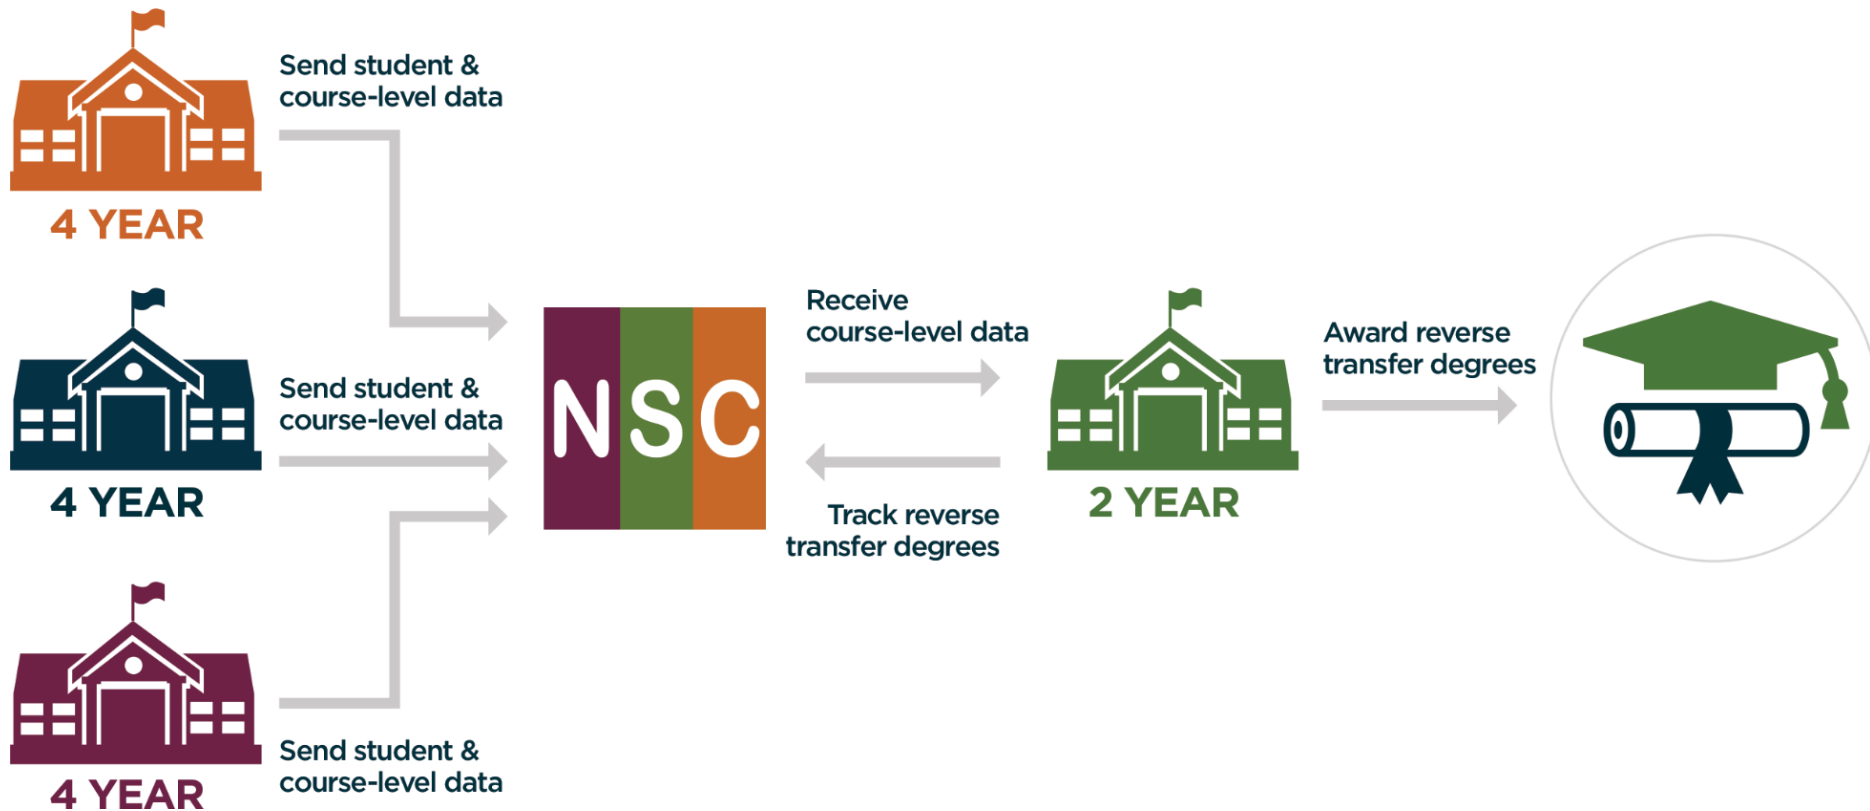

Grant

Goals– To make reverse transfer easier to send and receive across the country.

- SPEEDE EDI and XML

- Sending and Receiving Pilot testing needed

- SIS system Banner, Colleague, Jenzabar, PeopleSoft

Steps for Piloting

Degree Granting Institutions

– 1. Must be Participating SPEEDE and agree to participate RT
– 2. Provide information on how you process SPEEDE today
– 3. We send test files for processing
– 4. Work together to make it work

Host/Sending

– 1. Must be Participating SPEEDE and agree o par
– 2. Generate a TS 130 compliant file for testing
– 3. We will work with you on this process
